Mentorship

PROFILE

For the last 15 years (since 2005), I have been engaged in the commercial development of large-scale web systems with multiple dependencies.

EMPLOYMENT HISTORY

List of Positions in Acronis, Acronis

Feb 2008 — Present

- For the last 10+ years, I've been working in various positions at Acronis.
- · Until August 2012, I worked in the Moscow office.
- · In Aug 2020 started development in Golang.
- $\cdot~$ In Jul 2021 I've changed the department I had been in for 13 years.

Career growth in Acronis:

- · Junior Perl Developer since Feb 2008 (half year)
- · Perl Developer since Aug 2008 (one year)
- · Senior Perl Developer since Aug 2009 (one year)
- Head of the Web Development Team since Dec 2010 (1.5 years)
- · Senior Architect since Jul 2012 (2 years) / outside of the office
- · Senior Perl Developer since Jul 2014 (5 years)
- Web System Administrator since Nov 2014 (1 year)
- Team Leader of the Perl Development Team since Nov 2019 (2 years)
- Senior Golang Developer since Jul 2020 (present time)

Between Nov 2014 and Jul 2015 I replaced **Web System Administrator** (non-primary position):

 More 70 servers (CentOS, Fedora, etc) in 2 DCs; 3 MySQL clusters (each 4 nodes); Installing of SW, Perl libraries, etc; Configure web servers; Grant/revoke access (SSH/MySQL/SUDO/etc); Security fixes like Poodle, Shellshock, GHOST; etc.

LANGUAGES

Russian

English

HOBBIES

Children's teacher, Bible, Chess

Golang Developer, Acronis

Aug 2020 — Present

- · Code Transfer from Perl to Golang
- · Development new feature
- · Bug-fixing

Team Leader of Perl Applications, Acronis

Remote

Nov 2019 — Jul 2021

I was the leader of a team of two (incliding mentorship), engaged in writing code, unit tests, writing documentation (including <u>POD</u>), as well as acting as a Release Manager.

- Writing design documentation and description of current systems.
- Improvement of code writing processes (Code Review, Implementation of <u>Perl Best Practices</u> (started migration of Perl codebase from more than 122,000 lines); Writing internal <u>Perl::Critic</u> rules; Implementation of Deployment Processes)
- · Supporting for employees from other teams.

Senior Perl Developer, Acronis

Moscow/Remote

Feb 2008 — Nov 2019

Support and development Web Infrastructure of Acronis.

- · Development for lot of Acronis web system and tools.
- · Synchronization of Libraries/Files between servers
- Prepare systems for works with 3rd party companies, like <u>Mailgun</u> and other.
- · Migration MySQL 3 to 5, later from DB to Cluster
- Development and Integration of "<u>Access control systems</u>" into the Intranet. Calculation every day ~ 12 000 transactions.
- Replacing the internal authentication system with <u>Active</u>
 <u>Directory</u>. More than 1500 employees used this system every day.
- · <u>SAX</u> parser (growth speed parsing of text more in 10 times)

and lots of other things...

Senior Architect, Acronis

Remote

Jul 2012 — Jul 2014

- · Designing Web Systems
- Reverse Engineering of current systems
- · Migration services between departments
- · Work for migration from old to new software.
- An entry point for critical requests to the web development team or issues with web systems
- · Coordinating the work of developers for critical requests
- · Splitting web systems on other servers
- · Research of new technology for the department
- Consultations for web developers and others department about web systems of Acronis
- · Backup of everyone employees in the department
- · Migration of servers from old software to new (like OS, Perl, etc.)
- · Web servers consolidation (different SW/OS/Perl libs/etc.)

Remote

Dec 2010 — Jul 2012

I was the head of the web development team.

- · Manage team (In team 6 direct report employees)
 - · weekly face to face meetings
 - engaging in solving professional and personal questions
 - · Half-yearly assessing **performance review** of the team
 - other activities (like organizing events, buying clothes with a department brand, etc.)
- **Project Estimation**. Every month, I presented estimates (ETA for development coding) for 7-10 projects.
- My team started using **Agile** development methodologies (a month later, as I became a manager)
- Launched a single documentation system (7 global items, more than 100 articles, through the quarter, after running this system, every month added ~ 30-50 new materials).
- Launched into operation a JIRA as a task tracker and project planning. Every month we have more than 100 new requests.

Security Administrator, Christian Vision

Kiev

Oct 2013 — Sep 2017

- Dedicated/Virtual servers installation, configuration and maintenance.
- · Solving security related issues.
- · Consulting on Internet technologies.
- · Assistance in writing specifications for development

Perl Developer, Metadesign

Krasnoyarsk

Feb 2005 — Dec 2006

- · ~ 20 web sites on production
- search-engine (incl. indexer)
- · adverising system (more 1.5M banners/day)

EDUCATION

Krasnoyarsk State University

Krasnoyarsk

Sep 2001 — Sep 2004

Faculty of Mathematics and Informatics.

Unfinished education. After 3 years of study, I left the university and started working.

College of Space Machine Building

Krasnoyarsk

Sep 1997 — Jun 2001

Faculty Automated Control Systems (IT education in all areas of application).

TECHNICAL SKILLS & KEYWORDS

Languages: Golang, Perl, Regular Expressions, PHP, Python, Go, SQL, JavaScript, jQuery, JQL, awk, sed, shell scripting, REST API, HTML, CSS.

Golang: Goland, golangci-lint

Perl: CPAN, AnyEvent, DBIx::SearchBuilder, LWP, HTML::Mason, mod_perl, Perl::Critic, POD, PPI, Rose::DB, Test::More, XML::* (incl. SOAP::Lite, etc.)

Databases: SQL, SQLite, MySQL/MariaDB, Sphinx Search.

Operating Systems: macOS, Linux (CetnOS, Red Hat, Fedora, Debian, Ubuntu), Windows.

Web/DevOps: Docker, Apache, Nginx, Isyncd, DNS, backup.

Tools: Git, GitHub, Subversion, vim, Perl::Critic, curl, HTTPie.

Atlassian: JIRA, Confluence, BitBucket, Gliffy, Trello.
